Sycamore Logistics LLC — Work Text Messaging Policy

Effective: November 8, 2026 · Owner: Operations · Applies to: all employees

1. Purpose

Sycamore Logistics LLC (the "Company") texts and calls its employees about their work. This policy explains:

- which phones receive those messages;
- how employees consent and are reminded of that consent;
- how they can stop messages;
- what records the Company keeps.

It puts into practice the **Consent to Automated Calls and Text Messages Policy** in the Employee Handbook.

2. Scope

This policy covers work text messages and calls sent from the Company's dispatch phone numbers, through the Company's dispatch system (Allium). These include:

- dispatch communications;
- safety alerts;
- route and schedule updates;
- replies to messages employees send to dispatch.

It does not cover recruiting or job-applicant messages, which have their own consent process. The Company does not send marketing messages under this policy.

3. Consent

1. **On hire, every employee is asked to complete the Text Messaging Consent form** in the Company's HR system (Paycom): an unchecked checkbox with the full consent language and links to the Privacy Policy and Terms, then an e-signature. Current employees complete it once. Every employee also acknowledges the Employee Handbook, which includes the Consent to Automated Calls and Text Messages Policy. Signed forms and acknowledgments are kept in each employee's personnel file.
2. **Consent covers the Company mobile device issued to the driver for each shift** (Mobile Device and Company Equipment Policy). The Company starts work texts only to Company mobile devices listed in its phone inventory. If anyone texts a dispatch number from a phone that is not a Company device, dispatch may reply within 24 hours of that person's last message; the Company never starts a text to that phone.
3. **Consent is not a condition of employment** (see section 6).

4. How a phone is assigned to a driver

- **Each day, the driver signs into the Amazon Flex app on the Company device issued to them.**

- **That sign-in records the phone's number against the driver for that day.** The record reaches the Company's dispatch system with the day's route data.
- **If the driver changes devices during the day** (for example, a device swap), the new sign-in records the new number. A Company device that moves to a different driver is recorded against the new driver.
- **Drivers must tell dispatch** about any device change.

5. Consent reminder on phone assignment

When a Company device is first assigned to a driver on a given day, it automatically receives a reminder text. It receives another whenever the driver's assigned Company device changes during the day. The reminder reads substantially as follows:

> *Sycamore Logistics: As agreed in your employee onboarding, this company phone receives dispatch, safety and route texts from us. Msg freq varies. Msg & data rates may apply. Terms: sycamore-logistics.com/en/legal/sms-terms. Reply STOP to opt out, HELP for help.*

- **Reminders are sent whenever a device is assigned or changes,** for the current day only. These are internal work messages to Company devices, so there are no sending-hour limits.
- **If a helper shares the driver's device on the same route,** the device receives one reminder. Every other driver assigned a device gets their own reminder.
- **No reminder is sent to a device that has opted out** (section 6).

6. Opting out and help

- **STOP:** replying **STOP** to any Company text stops all further texts from the Company's dispatch numbers to that phone number. Replying **START** resumes them.
- **HELP:** replying **HELP** returns the Company's contact details.
- **Shared Company phones:** a STOP from a Company device stops texts to that device for every later driver who carries it. A driver who receives a Company device that has been opted out should tell dispatch. To resume texts, they text **START** from it.
- **Personal phones:** the handbook's right to revoke consent by email applies to an employee's personal mobile telephone. The Company starts work texts only to Company devices. An employee who texts dispatch from a personal phone can stop replies at any time by replying STOP, or by revoking consent as the handbook provides.
- **Opting out has no disciplinary consequence.** If a Company device is opted out, dispatch may call the driver once to explain why texts help on the road and ask whether they would like to resume. Resuming is the driver's choice, made only by texting **START** from that phone; dispatch never resubscribes a phone. A driver who declines keeps working, and dispatch reaches them by phone call until texts are resumed.

7. Records

For evidence of consent and compliance, the Company keeps:

Record	Where it is kept
Each employee's signed Text Messaging Consent form	Paycom personnel file
Each employee's signed handbook acknowledgment	Paycom personnel file

Record	Where it is kept
Each phone assignment (driver, phone, date and time, source upload)	Dispatch system
The Company phone inventory: each phone added or removed, by whom, when, and from which source list	Dispatch system
Each consent reminder: the driver, the phone, the message text, the time sent, and the carrier delivery status	Dispatch system and the Company's messaging provider (Twilio)
Each reminder not sent, with the reason (opted out, not a registered Company device, not on the roster)	Dispatch system
Every STOP, START and HELP received, with its date and time	Dispatch system
All work texts sent and received on the dispatch numbers	Dispatch system

- **Retention:** the Company keeps these records in its dispatch system for at least **four years**. Copies held by the messaging provider follow that provider's retention.
- **Who can see them:** they are available to Company owners and managers. The Company produces them on request to its messaging provider, carriers, or regulators.
- **Reports:** reminder records can be exported by day, for any date range.

8. Privacy

- **Phone numbers and message content are used only to run the Company's operations.**
- **The Company does not sell or share** SMS opt-in data or personal information with third parties for marketing purposes.
- **Policies:**
  - Text Messaging Privacy Policy: https://www.sycamore-logistics.com/en/legal/sms-privacy
  - Terms & Conditions: https://www.sycamore-logistics.com/en/legal/sms-terms

9. Responsibilities

- **HR:**
  - collects the Text Messaging Consent form, and makes sure every new hire acknowledges the Employee Handbook, before their first shift;
  - keeps the acknowledgments.
- **Dispatch:**
  - acts on opted-out phones shown in the dispatch system.
- **Managers:**
  - review the reminder records weekly;
  - keep the Company phone inventory current: add any Company device flagged as not registered, and remove devices that are retired, lost or reassigned outside the Company.
- **Drivers:**
  - sign into Amazon Flex on the Company device they were issued;
  - tell dispatch about any device change.
